Features

Features

- 1.Unique and luxury design: Design is according to front loading washing machine with unique appearance.
- 2.Front or back air discharge: front air discharge can discharge the moistures in the clothes directly from the bottom of the front panel to the ambient space, which can solve the troubles of penetrating the wall for air outlet when the back side of drying machine is against the wall, convenient and free of worry; the back air discharge is to discharge the moistures of the clothes directly from the back side of the product to the outdoors without influence on the interior environment. Front or back air discharge can be selected in accordance with the local conditions.
- 3.MicroControl: Simple and convenient operation with the help of PCB board, and it will feel the temperature when drying automatic.
- 4.Big size door window: See the procedure of drying clearly through this window.
- 5.Open the door with 180°:It is very convenient to put in and out clothes with 180° angle opening range.
- 6.Compact instruction: Suitable capacity and unique outlook with anti-dust,anti-humidity, anti shake, long life and low noise design.

Notice before use

The first step:Power source and grounding.

The dryer employs alternative current with the rated voltage and frequency. When the voltage fluctuates between 6% of rated voltage, the dryer can work normally. A special power socket for the dryer had better be set beside the dryer for convenience and safety. The method of connection of the socket is as the figure below.

Notices:

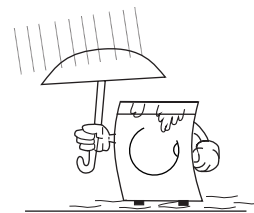

The socket and the grounding wire must be installed by an electrician to prevent incorrect installation or use of the socket and to guarantee the safety of use of electricity. The power wire of the dryer employs Y connection ,if the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

No connection of the grounding wire with the neutral wire,otherwise the cabinet will be charged, which is likely to cause the danger of electric shock.

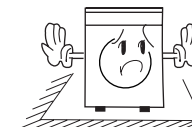

Installation before use

Step2:Precautions

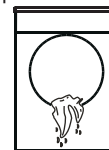

Do not store or install the dryer where it will be exposed to water or the weather. If yes, please make them dry before use.

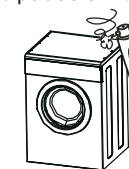

Please put dryer to a ventilated place for better wind circulating and to avoid hidden damage.

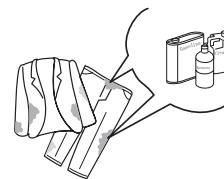

Dank clothes have to be dehydrated well and then be able to put inside for drying which could avoid problems cost by drip.

Make sure combustable sprayer will not be close to dryer when it is working, and once the gas leaks, do not touch plug or start / pause on it.

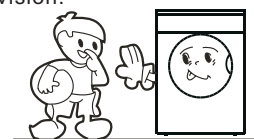

It is not allowed to dry clothes contains combustable cleanser , gasoline etc.

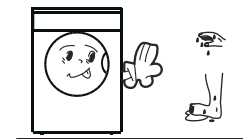

Don't operate this dryer if it is damaged, malfunctioning,partially disassembled or has missing or broken parts.

When the dryer is working, the back side will become hotter. In order to avoid such risk, The dryer is not intended for use by young children or infirm persons without supervision.

Please do not use the machine when your foot or hand with water..

Installation before use · Simple installation

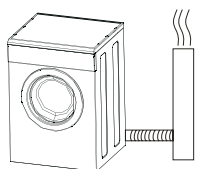

Do not put any heavy or hot article on the top of dryer to avoid deformation of control panel.

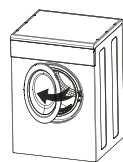

Do not try to dry raincoat or fluff clothes or whatever things contains rubber or elasticity materials on any heat setting.

It is not allowed to connect flex tube with flue directly, this is to avoid dust and smoke coming through.

Only open door once program is finished to avoid scalding.

This product belongs to type I electronic products and please take note of safety problem accordingly:

1. It is rule to use power which is buried in the earth and will not touch any socialequipments such as gas pipe or water pipe etc. Make sure the difference of different lines and they are not connected.

2. Please use special socket which is according to National Standard and will endure 10A current.

To be safe, please make improvements as soon as possible according to the rules and suggestions mentioned above.

If your clothes contain following mark or could not be dried in dryer, please stop using your dryer.

Not used for dryer in the tub

Hang for dry

Drip dry

Flat dry

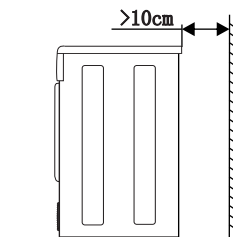

Dry automatically

Simple installation · Operation explanation

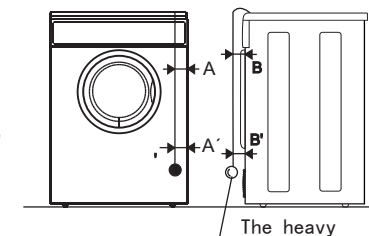

Simple Installation

Step 1: Dryer should be placed in a ventilated area with not less than 10 cm distance from the wall. If placed in a room such as bathe room, it is suggested there are no obstacles within 1.5m in front of dryer and keep ventilated.

Step 2: The horizontal adjustment:

Tie a heavy subject on the string on the front and two sides of the dryer. Please refer this to below figure, and if A=A', B=B', this means the dryer is placed horizontally. While the opposite, you could place something On the grounding.

Notice:

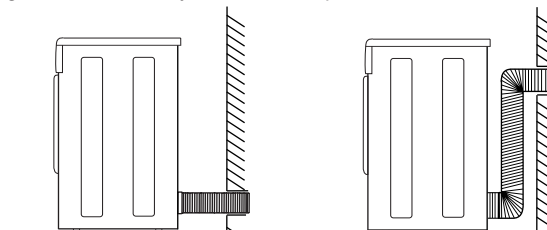

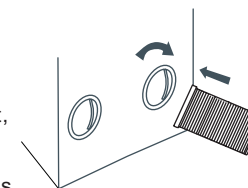

If dryer could not be placed horizontally (the lean angle is no more than 2), the dryer will work unbalanced or stop working sometimes.

Notice when installing:

- Do not install the dryer in the open air or place easily damaged by rain;
- Do not place the back of dryer near curtain or something in the wind;
- Do not place the dryer near gas or flammable area.

Step 3: Regarding the fixing of flex tube:

- Connect one side of flex tube with whorl to the back vent, then fix it deasilly till tight.
- The other end of flex tube will be extended to outdoor, pls Refer the right assemble way to the below pictures.

Simple installation · Operation explanation

Operation explanation

1.Preparing before drying

- Clothes have to be washed and spun before putting in the dryer.
- Put same kind clothes to dry together.
- Sort your clothes into loads that take a similar time to dry e.g. Heavier items form light items, it is suggested change the inner side of clothes to outside and then put into dryer.
- Make sure the decoration and buttons are safe for high temperature and will not damage the inner tub of dryer. Make sure the clothes are well protected.
- It is better to turn out the pocket for drying.
- Please check the clothes after washing, and if still dirty on clothes, those dirty may not disappear after drying.
- Please make sure the power socket are well connected and will not touch conduit of water supply and gas supply etc.

2.Make sure the filter is well cleaned and in the right position.

3.Put clothes into the dryer.

- It is better to put clothes with 1/3-1/2 capacity of inner tub for drying because drying needs space to make clothes tumble evenly and overfilling clothes will not get a good result.
- When drying big clothes, it is better to fulfill with small pieces of clothes together.
- When drying expensive or little clothes, it is better to add two towels so as to reach better drying result.
- Do not overdry the clothes to avoid crimple, roughness or static electricity etc.

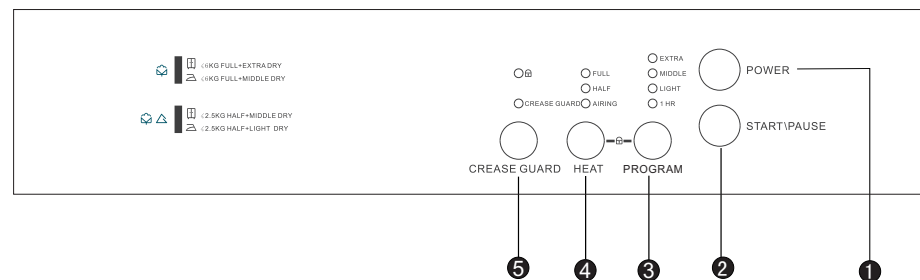

Operation explanation

The reference weight of dry clothes

 Mixed-fabric clothes (about 800g)	 Jacket (about 800g cotton)	 Jeans (about 800g)	 Towel quilt (about 900g cotton)
 Single bedsheet (about 600g cotton)	 Work clothes (about 1120g)	 Sleepwear (about 200g)	 Long sleeve shirt (about 300g cotton)
 Short sleeve shirt (about 180g cotton)	 Short pants (about 70g cotton)	 Socks (about 50g mixed-weave)	

4.Close the door

5.Instruction on control panel

- 1 Power
- 2 Pause/Start
- 3 Program (extra / middle / light / 1 hour)
- 4 Heat (full / half / airing)
- 5 Crease Guard

Note: Push Program and Heat at the same time, function could be changed to Lock.

1) Push Power button;

2) Program setting will according to the texture and capacity of clothes. Every time pushing the Program button, the indication light will shine orderly for a while, and stop at the program you choose;

Operation explanation

3)Temperature setting will according to the texture and capacity ofclothes. Every time pushing the Heat button, the indication light will shine orderly for a while, and stop at the program you choose;

4)For function of Crease Guard, it is better to dry some expensive or easily creased clothes. When the indication light is on, it works.

5)Push Start / Pause button, it works while push it second time, it stops working for 3 seconds, and could be adjusted to restart program, and also add or reduce clothes through the door but to avoid hot steam scalding. Push again, and it continues working. This button is used for switch between start and pause. If push Start / Pause button directly, dryer will work with middle dry and full heat automatically.

6)Lock function could be started when push Program and Heat button at the same time with indication light on, and this can avoid children's mistake. If push the two buttons again, dryer will be unlocked.

Note: Push all buttons will cause a short buzzer with shining lights.

Drying Clothes instruction

Program	Max volume of dry clothings	Temperature	Clothings type	Air-cold	Anti-rease	Child-lock	About dry time
An hour dry	3. 0kg	Full heating√	Easy to dry and not need lots of time to dry on clothings.	10min	√	√	60min
	<3. 0kg	Half heating√					
	2. 0kg	Air-dry√	Fine fabric and not need to heat on clothings.				
Light dry	4. 0~6. 0kg	Full heating√	Chemical fiber and small size clothings.	10min	√	√	100min
	<4. 0kg	Half heating√					
Middle dry	4. 0~6. 0kg	Full heating√	Cotton weaving and jeans	10min	√	√	140min
	<4. 0kg	Half heating√					
Extra dry	4. 0~6. 0kg	Full heating√	Bedsheet、cotton clothings and jeans.	10min	√	√	170min
	<4. 0kg	Half heating√
